Rashid Serjani

Members Absent: -

Topics Discussed:

1. Front-end Development
2. Symfony project start up

Decisions Made:

1. We worked on the final User Interface designs for both web and mobile application. Same as last week, we were divided in two groups of three members, and worked accordingly to the remaining mentor pages and started on the student pages. We decided to go with the same theme as we chose for the prototype, with minor changes.
2. We created our Symfony project for the WebApp, firstly locally on Denada's computer and we worked using TeamViewer. We imported the templates and re-organized them as twig files. We created routers for all the main pages, linked them to the corresponding twig file and installed the required packages. To access it from the web browser, we learned how to configure a new virtual host specifically for e.classroom.com.

Tasks Assigned:

1. Continuing with code
2. Uploading the code on the repository and creating branches for each member's work.
